

## Digital Transformation Director

The most important value of Moholy-Nagy University of Art and Design (MOME) is its open mindset to the world, in which respect for tradition, aspiration and promoting development all take part equally. Our mission is to find and provide answers to today's challenges with the tools of art and design, in cooperation with representatives of other fields.

The ambition of MOME is to become Central Europe's leading educational center for innovation and creative art by 2030.

Digital transformation is one of the most important pillars of the renewal development strategy of Moholy-Nagy University of Art and Design (MOME) which includes Smart Campus development, the implementation of information management systems, the development of our technology park (Tech Park) and the purchase of digital equipments enabling creative work for students and professors.
